**Data Analysis:** Microsoft Excel, Data Cleaning, Descriptive Statistics, Probability Analysis, Data Visualization

**Languages:** Mandarin Chinese (native), English (professional), Japanese (elementary)

### PROFESSIONAL EXPERIENCE

#### **National Taiwan University**

Taipei, Taiwan

##### ***HEAD MEN'S BASKETBALL COACH***

*Jul 2023 – Mar 2026*

- Directed comprehensive season-long practice planning, opponent scouting, player development, and in-game strategy, guiding NTU to a top-four Division II finish and promotion to Division I
- Identified a 0.16-point-per-possession defensive advantage in half-court coverage (0.92 vs. 1.08), informing a strategic shift from full-court pressure
- Mentored student-athletes through individualized feedback, clear performance standards, and leadership development, strengthening accountability and team cohesion

##### ***ASSISTANT MEN'S BASKETBALL COACH & VIDEO COORDINATOR***

*Jul 2021 – Jul 2023*

- Founded and led a 6-member volunteer analysis team, developing an Excel-based possession-tagging workflow to evaluate lineup performance, shot quality, and opponent tendencies
- Produced detailed opponent scouting reports and film breakdowns that translated tactical patterns and player tendencies into clear practice priorities and actionable game-preparation plans
- Developed training and review procedures for student analysts, improving film-tagging consistency and accuracy

#### **Very Impressive Product Co., Ltd.**

Ho Chi Minh City, Vietnam

##### ***R&D PRODUCT MANAGER***

*Aug 2018 – Jul 2019*

- Led 5+ end-to-end carbon-fiber bicycle frame development projects for global clients, including Decathlon (B'Twin) and Specialized, from requirements and design development through sample approval and mass production
- Coordinated client, engineering, manufacturing, and quality teams across the United States, China, France, Vietnam, and Taiwan to resolve technical issues and maintain product quality and project timelines
- Managed concurrent prototype revisions, sample approvals, and production handoffs while balancing client expectations, technical feasibility, and manufacturing constraints

### ANALYTICAL PROJECT EXPERIENCE

#### **Basketball Analysis Platform | YouTube Analytics, Data Storytelling | [youtube.com/@DrayDrayBear](https://www.youtube.com/@DrayDrayBear)**

- Translated complex basketball concepts, game film, and performance data into clear Mandarin-language explanations that helped nontechnical audiences understand strategy and player impact
- Analyzed click-through rates, early-view performance, and engagement patterns through YouTube Studio Analytics to refine topics, titles, thumbnails, and content strategy
- Scaled the platform to 200K+ subscribers and 32.7M+ lifetime views by combining audience analytics, iterative content development, and data-informed decisions
