

DATA ANALYST

MS Business Analytics candidate and research assistant who previously led data-driven scouting and strategy as a university head basketball coach. Proficient in Python, SQL, and R for regression, machine learning, data validation, and reproducible workflows; skilled at turning analysis into clear, actionable recommendations for technical and nontechnical audiences.

EDUCATION

Wake Forest University School of Business <i>Master of Science in Business Analytics</i>	Winston-Salem, NC May 2027
National Taiwan University <i>Bachelor of Science in Chemistry</i>	Taipei, Taiwan Jan 2018

TECHNICAL SKILLS

Programming & Tools: Python (pandas, PyTorch, Plotly, Streamlit) | SQL | R | Excel | APIs
Statistics & Modeling: Regression | Hypothesis Testing | Machine Learning | Deep Learning | Model Evaluation
Data & Analytics: Data Cleaning & Validation | EDA | Data Visualization & Dashboards | Reproducible Workflows
Languages: Mandarin Chinese (Native) | English (Professional)

SELECTED PROJECTS

- NBA Playoff Matchup Adjustment Tracker | Python, Streamlit, Plotly, pandas**
- Built an interactive dashboard showing how playoff teams reassign defenders on star players game by game, using 7,400+ tracking matchup records from 7 series (defender heatmaps, transition views, series leaderboard)
 - Separated real adjustments from noise by decomposing each change into rotation and assignment effects and benchmarking it against a sampling-noise baseline (e.g., OKC's Game 2 switch onto Wembanyama in the 2026 West Finals)
- ECG Patient Matching with Contrastive Representation Learning | Python, PyTorch, InfoNCE**
- Developed patient-level ECG embeddings to match unseen patients across clinical and wearable recordings (2,000+ patients)
 - Compared CNN- and GRU-based beat encoders in an InfoNCE contrastive-learning framework (AUROC above 0.95)
 - Ran ablations and longitudinal error analyses on how morphology and physiological-state shifts affect matching over time

EXPERIENCE

Wake Forest University <i>RESEARCH ASSISTANT</i> - Validate corporate, exchange, and market data for a multinational firm dataset supporting faculty research on ESG-linked executive compensation, documenting source evidence to resolve coding inconsistencies - Collect firm-level data with Python, APIs, and structured web-based collection in reproducible research workflows	Winston-Salem, NC Sep 2026 - Present
National Taiwan University <i>HEAD MEN'S BASKETBALL COACH</i> - Directed team operations, performance analysis, opponent scouting, player development, and game strategy, leading NTU to a top-four Division II finish and promotion to Division I - Found half-court defense allowed 0.16 fewer points per possession than full-court pressure (0.92 vs. 1.08), shifting strategy <i>ASSISTANT COACH & VIDEO COORDINATOR</i> - Founded a 6-member analytics team and Excel possession-tagging workflow to evaluate lineups, shots, and opponents - Translated opponent film and performance data into scouting reports, practice priorities, and game plans	Taipei, Taiwan Jul 2023 - Mar 2026 Jul 2021 - Jul 2023
DrayDrayBear, YouTube Channel <i>CONTENT CREATOR</i> Grew a Chinese-language basketball channel to 200K+ subscribers and 32.7M+ views using CTR and engagement data	Remote Jul 2019 - Present
Very Impressive Product Co., Ltd. <i>R&D PRODUCT MANAGER</i> Led 5+ end-to-end carbon-fiber bicycle frame projects for Decathlon (B'Twin) and Specialized from requirements through mass production, coordinating client, engineering, manufacturing, and quality teams across 5 countries	Ho Chi Minh City, Vietnam Aug 2018 - Jul 2019
